---

## Summary

---

As a frontend web developer with a 1 year of hands-on experience, I've had the privilege of working on real-world projects that have sharpened my expertise in crafting responsive and visually engaging user interfaces. My skill set includes **React Native**, **React.js**, **HTML**, **CSS**, **JavaScript**, **Tailwind CSS**, **Swift**, and **SwiftUI**, enabling me to build performant and scalable web applications across both web and iOS platforms.

## Experience

---

### PairaLabs Technologies

Frontend Developer | 09/2023 - 10/2024

#### Projects at PairaLabs Technologies

**OdishaTaekwondoAssociation-** Developed the "OdishaTaikonda" web application, featuring both admin and user interfaces. The platform allows students to apply for events, view events happening in specific years, and register for clubs and events. The admin panel enables administrators to add and manage data that is showcased on the user-facing website.

**News Web App-** Developed a news web application that delivers the latest news from across India. The platform features an admin interface where administrators can post the latest news and videos, which are then showcased on the user-facing website. The tech stack includes React, Tailwind CSS, and Redux, ensuring a dynamic and responsive user experience with efficient state management.

**Clickezy App-** Clickezy is a photography booking app developed using **React Native**. The app provides a platform for users to seamlessly book photographers for various events, including weddings, parties, and corporate gatherings. It enables photographers to efficiently manage bookings, accept requests, and schedule shoots, all within the app. By eliminating the need for traditional local arrangements,

**Heads ios App** - Developed an app called "Heads" for the Government of Odisha, a comprehensive college management system for **iOS using Swift and SwiftUI**. The app allows students to access and manage their profile details, academic information, leave records, and hostel details. Additionally, students can report hostel issues, reserve library books, explore college and hostel facilities, apply for placements, and register for college events. By serving students, faculty, and administrators, the app provides a streamlined platform to efficiently manage various aspects of college life, enhancing overall institutional communication and management.

**Sanrakshan ios App** - The Sanrakshan app is a government of odisha platform designed to assist ST, SC, and SEBC communities by streamlining the officer assignment and appointment scheduling processes. This app allows users to seamlessly assign officers, book available slots, and create schedules for officers based on their availability. Users can also view how many officers are available on specific days and inspect booked slots for greater transparency. With a focus on efficiency and accessibility, the Sanrakshan app enhances the overall management of officer resources, offering a more organized and user-friendly experience for both administrators and the communities they serve.

### Byecom Innovation Private Limited | OR

Junior Developer | 10/2022 - 08/2023

- Managed the creation of a local market app for affordable food and grocery delivery. Led the admin team in developing and launching the website. Learned a great deal from my team during this project, enhancing my skills in web development
- I conducted comprehensive testing procedures to evaluate the functionality and performance of both the website and the application, ensuring their seamless operation.

## Education

---

Raajdhani Engineering College Bhubaneswar
